3 said rights in "first priority class", then during the continuance  
4 of such shortage, the owners of such rights shall prorate the avail-  
5 able water supply in accordance with the respective allotments in  
6 said "first priority class" as set forth herein. Said right in  
7 "second priority class" is subject and inferior to said rights in  
8 "first priority class", but is superior in priority and in right to  
9 all other water rights on said Pine Creek. Said rights in "third  
10 priority class" are equal in priority and correlative in right,  
11 are subject and inferior to said rights in "first priority class"  
12 and "second priority class", but are superior in priority and in  
13 right to all other water rights on said Pine Creek, and at all  
14 times when the available water supply of Pine Creek is inadequate  
15 to supply all of said rights in "third priority class", then during  
16 the continuance of such shortage, the owners of such rights shall  
17 prorate the available water supply, if any, in excess of the quan-

20 herein, provided however, that said E. E. WILSON and NINA JUNE  
21 WILSON are entitled to divert no greater portion of the 1.50 cubic  
22 feet per second allocated herein than is necessary to deliver 0.75  
23 cubic foot per second at the point where the Phillips Ditch enters  
24 their lands in the E $\frac{1}{2}$  of Lot 1 of Section 3, T 23 N, R 1 W, M.D.B.  
25 & M.

26 6. That all allotments set forth in "first priority class"  
27 and "second priority class" shall be for continuous usage during the

32 That all allotments set forth in "third priority class"

1 shall be for continuous usage during the season from March 1 to  
2 October 31, both dates inclusive, of each and every year for gener  
3 irrigation purposes.

4 7. That the points of measurement of all allotments of  
5 water herein set forth shall be at or near the respective points of  
6 diversion from Pine Creek.

7 8. That although all quantities of water herein allotted  
8 to the several parties for direct application to beneficial use  
9 are severally expressed in terms of continuous flow, nevertheless,  
10 nothing herein contained shall be construed as limiting or restrict  
11 the rights of any such parties to rotate in the use of water, or  
12 the right of any party hereto to divert for limited periods of time  
13 convenient "irrigation heads" and thus apply water to his lands at  
14 a greater rate than that indicated by the continuous flow so allote  
15 provided, that such practice of rotation or use of "irrigation head  
16 shall not result in the use by any such party of a total quantity  
17 of water during any thirty day period in excess of the equivalent  
18 of such party's continuous flow allowance for thirty days; and pro-  
19 vided further, that such practice of rotation or such use of "irriga  
20 tion heads" shall not impair or infringe the right of any other suc  
21 party.

22 9. That nothing herein contained shall, or shall be constr  
23 to, prevent any of the parties hereto, who jointly use a ditch, whe

25 employing by agreement of such joint users of said ditch a system of  
26 rotation in use as among themselves or prevent any party hereto who

2 10. That each of the parties shall be, and they, jointly and  
3 severally, hereby are perpetually enjoined and restrained from  
4 doing any act or thing in violation of the provisions of this  
5 decree, or from diverting any water from said Pine Creek at any  
6 time in violation of the terms hereof, or from diverting any of  
7 such water at any time in excess of a quantity of water reasonably  
8 necessary for and being put to beneficial use, or from doing any-  
9 thing, directly or indirectly, that will obstruct or interfere with

19 Report of Referee on file herein shall bear the costs therein  
20 charged against them respectively.
