NO. 13775
DECREE

16

...oOo...

17 The above entitled cause having come on regularly for hearing, trial
18 and determination on the 19th day of January, 1950, before this Court sitting
19 without a jury, Mark C. Nosler appearing as attorney for the Department of
20 Public Works of the State of California, Division of Water Resources, acting
21 through the State Engineer, hereinafter referred to as "Department"; Emmet J.
22 Seawell, Assistant United States Attorney, Northern District of California,
23 appearing specially for the United States of America pursuant to, and in
24 accordance with that certain Stipulation for Order of Determination dated
25 November 19, 1946, on file in the above entitled proceeding; C. J. Luttrell,
26 appearing as attorney for Joseph Rivallier, Lena Butler, Edward Burton and
27 Emma S. Burton, his wife, Burnell Burton and Rose A. Burton, his wife, John
28 Heide and Lorene M. Heide, his wife, and Douglas Eastlick and Elma J. Eastlick,
29 his wife; and George A. Tebbe appearing as Attorney for Cornelius J. Mulloy,
30 L. Dennis Mulloy and F. L. Lathrop and Georgina C. Lathrop, his wife; all parties
31 in interest in said proceeding having been duly and regularly notified of said

1 investigation of the flow of Shackelford Creek and its tributaries, and of
2 the conduits diverting water, and of the lands irrigated or irrigable there-
3 from, and proceeded to gather all other data and information essential to
4 the proper determination of the rights in and to the use of the waters
5 therefrom, and thereafter the Department reduced its observations, data,
6 information and measurements to writing and executed surveys and prepared
7 maps from the observations of such surveys in accordance with uniform
8 rules and regulations duly and regularly adopted by the Department, which
9 surveys and maps showed with substantial accuracy the course of the streams
10 involved in said proceeding, the location of each conduit diverting water
11 therefrom, land irrigated and capable of being irrigated by each conduit,
12 and the kind of culture upon said irrigated lands. Said maps were pre-
13 pared by the Department as the surveys and observations progressed, and
14 when completed were duly and regularly filed and made of record in the
15 office of the Department.

16 5. Upon the completion of the aforesaid measurements and maps
17 and after filing of said observations, data, information and measurements,
18 as aforesaid, the Department, by order duly given and made, gave notice
19 by publication thereof, setting forth the date prior to which proofs of
20 claims to be furnished by claimants, in and to the use of the waters involved
21 in said proceeding, were required to be filed with the Department, and the
22 Department gave like notice and enclosed therewith blank forms of proofs
23 by registered mail, with postage fully prepaid thereon, to each claimant to
24 rights in and to the use of the waters involved in this proceeding, insofar
25 as such claimant could be reasonably ascertained at his last known place of
26 address. Thereafter the time allowed within which proofs might be filed
27 was extended by orders duly given and made by the Department, to and includ-
28 ing August 15, 1945, and within said period as so extended claimants herein
29 duly filed with the Department thirty-seven proofs of their respective
30 rights in and to the use of the waters involved in said proceeding. Jesse
31 Arnold Cason and Roy J. Helm neglected to make proof of their claim of

1 water right under Application 10350, Permit 6113, within the time allowed
2 for filing such proof. The Department has determined herein the rights of
3 said parties on such evidence as it has obtained and has on file in the way
4 of maps, plats, surveys, transcripts and other data essential to a deter-
5 mination of the water right involved.

6 6. After the filing of said proofs by claimants as aforesaid,
7 and after the expiration of the time fixed by the Department for the
8 filing of said proofs, the Department duly assembled all proofs which
9 had been filed and prepared and duly certified an abstract of all said
10 proofs entitled "Abstract of Proofs of Claims, January, 1946", and there-
11 after by order duly given and made, prepared a notice fixing and setting a
12 time and place convenient to the claimants when and where evidence taken by
13 or filed with the Department would be open to inspection for a period of
14 not less than ten days; and a copy of said notice together with a copy of
15 said abstract of proofs was thereafter, and more than fifteen days prior
16 to the first day prescribed in said order as the commencement of the period
17 of such inspection, duly mailed by registered mail, with the postage fully
18 prepaid thereon, to each claimant who had appeared and filed proofs, and
19 thereafter and in accordance with said notice, all of the evidence taken by
20 or filed with the Department was open for inspection at the times and in
21 the place and for the period designated in said notice, and any and all
22 persons during said period were permitted to inspect such evidence and
23 proofs, and during all of said period of inspection, a representative of
24 the Department was present.

25 7. Forty-one notices of contests of claims were filed with the
26 Department within fifteen days after expiration of the time during which
27 said evidence and proofs were opened to public inspection; within ten days
28 after the receipt of the notice of each of said contests, the Department
29 notified by registered mail the contestants and the claimants respectively
30 involved in each of said contests of the respective time and place fixed for
31 hearing the matter of said contests, each of said times being fixed not less

1 than fifteen nor more than sixty days from the respective time the Depart-
2 ment mailed said notice of hearing; and the Department duly opened the hear-
3 ings of contests at the respective times and places fixed by said notices
4 of hearing; and at said times and places duly continued said hearings which
5 were thereafter resumed from time to time after notice duly given by the
6 Department until all contests filed in the proceeding had been disposed of
7 by agreement. A transcript of all testimony taken at each of the aforesaid
8 hearings was prepared and has been duly filed in this proceeding.

9 8. An agreement entitled "Stipulation for Order of Determination",
10 is on file and of record in this proceeding. Said agreement was signed by
11 all parties to the determination except Jesse Arnold Cason and Roy J. Helm,
12 whose joint claim of right is based upon Application 10350, Permit 6113 be-
13 fore the Department. Said agreement provides that all of claimants' rights
14 and interests of whatsoever kind and character in and to the use of the
15 waters of Shackelford Creek and its tributaries in Siskiyou County,
16 California, are thereby finally settled and compromised as set forth in
17 the agreement. Said agreement authorizes the Department to enter its order
18 determining and establishing the several rights in and to the use of the
19 waters of said Shackelford Creek and its tributaries, pursuant thereto.

20 9. Said Department duly made, on October 31, 1949, its order
21 determining and establishing the several rights to the waters of Shackelford
22 Creek and its Tributaries, in Siskiyou County, California, which said order
23 was entered of record on said date in the office of said Department in
24 Book 2, Orders of Determination, at page 75, which said order was duly
25 certified by said Department. Thereafter said Department caused said Order
26 of Determination so certified to be printed and a copy thereof to be sent
27 by registered mail, with postage fully prepaid thereon, to each person who
28 filed proof of claim, directed to the last known address.

29 10. At the time of submission of said proofs, said Department
30 collected the fees due thereon, and after the time of mailing its Order of
31 Determination as aforesaid, computed the entire expense incurred in perform-

1 ing the duties prescribed, in this proceeding, including salaries, wages,
2 traveling expenses, and all costs of whatever character properly chargeable
3 to the proceeding, and duly made an equitable apportionment against the
4 parties, of said expense in excess of the total amount received by the
5 Department from claimants with their submission of said proofs, and duly
6 served, on November 30, 1949, a notice of statement and apportionment of
7 said expense, by registered mail with the postage fully prepaid thereon,
8 on each of the parties to this proceeding. No objections having been
9 filed by any party to this proceeding to said statement and apportionment
10 of expense within the period prescribed; said statement and apportionment
11 of expense was duly approved by the Court on January 19, 1950; and said
12 Court duly ordered that all apportionments of expense remaining unpaid
13 at the time of entry of decree should be included therein.

14 11. After entry of the Order of Determination as aforesaid,
15 and on November 23, 1949, a certified copy thereof, together with the
16 original evidence and transcript of testimony filed with or taken before
17 the Department, all duly certified by said Department, was filed with the
18 clerk of the Superior Court of the State of California in and for the
19 County of Siskiyou. Upon the filing of said certified copy of said order,
20 evidence and transcript with the Clerk of said Court, and on November 23,
21 1949, the Department procured an order from said Court setting January 19,
22 1950, at ten o'clock in the morning of said day in the courtroom of said
23 Court in the City of Yreka in said county and state, as the time and
24 place for hearing on said Order of Determination. The Department there-
25 upon procured from the Clerk of said Court a certified copy of said order of
26 said Court setting the time and place for hearing as aforesaid, and forthwith the
27 Department mailed a copy of such certified copy of said order by registered
28 mail, with postage fully prepaid thereon, addressed to each known party in
29 interest at his last known address, and duly caused said certified copy of
30 said order to be published, and duly filed with the Clerk of said Court
31 proof of such service by registered mail and publication.

1 12. No exceptions were filed with said Court within the pre-
2 scribed time and manner, and said proceeding came on duly and regularly
3 for hearing before the Court, on January 19, 1950, at which time said
4 Court made an order affirming said Order of Determination.

DESCRIPTION OF AREA INVOLVED

7 13. Shackleford Creek rises on the northeasterly slope of the
8 Salmon Mountains in the westerly portion of Siskiyou County, California.
9 It follows a northeasterly course to the rim of Quartz Valley and thence
10 east and north through said valley to its junction with Scott River at the
11 lower end of Scott Valley. Mill Creek, the only important tributary, has
12 its source some two miles east of the headwaters of Shackleford Creek,
13 flows northeasterly and thence northerly to its junction with Shackleford
14 Creek at the point where the latter stream turns north through Quartz
15 Valley. Evans Creek, a small stream which drains the comparatively low
16 mountains forming the southern rim of the basin, is tributary to Mill
17 Creek from the south. The drainage area of these streams above the rim
18 of Quartz Valley is about thirty-one square miles and ranges in elevation
19 from about 3,000 to 7,500 feet. Quartz Valley embraces the entire
20 agricultural area within the drainage basin. It is about two miles wide
21 by about six miles long with the major axis and drainage from the south
22 to north.

23 14. The waters of the stream system are used for irrigation,
24 domestic and stock-watering purposes, with the two latter uses being
25 largely incidental to irrigation. A total area of approximately 2,622
26 acres of land is irrigated. The elevations on this area range from about
27 3,100 feet at the south end of Quartz Valley to about 2,650 feet along
28 Scott River. A portion of the irrigated land, situated in the Oro Fino
29 Creek, Sniktaw Creek and Scott River drainages, lies outside the watershed
30 of the stream system.

31 15. The climatic characteristics of the area, in common with

1 similar mountain valley areas in the north central portion of California,
2 are deficient rainfall, wide range of temperature variations, low humidity
3 and rapid evaporation during the growing season. The average growing season
4 in the area is estimated to be about 140 days.

5 16. The principal crops grown on the irrigated lands are meadow
6 hay, meadow pasturage, and grain. A small percentage of the irrigated area
7 is cropped to alfalfa, corn and potatoes. The crops grown are well adapted
8 to the gravelly loam soils of the area.

9 17. The successful production of crops within the area is de-
10 pendent upon irrigation, and since the water supply of Shackelford Creek
11 and its tributaries is inadequate for all agricultural needs throughout
12 each irrigation season, it is essential that the rights in and to the use
13 of said waters be determined in order that there may be an orderly distribu-
14 tion thereof to the lawful owners.

15

16 GENERAL DEFINITIONS, LIMITATIONS AND PROVISIONS

17 18. The term "proceeding" when used herein means "in the matter
18 of the determination of the rights of the various claimants to the waters
19 of Shackelford Creek and its tributaries in Siskiyou County, California";
20 the term "Department" when used herein means the "Department of Public
21 Works of the State of California, acting through the State Engineer"; the
22 term "Water Code" when used herein means the Water Code of the State of
23 California as amended; the term "stream system" when used herein means
24 Shackelford Creek and its tributaries in Siskiyou County, California; the
25 term "claimant" when used herein means a party claiming rights in and to
26 the use of the waters of Shackelford Creek and its tributaries in Siskiyou
27 County, California; the term "proof" when used herein means "Proof of
28 Claim of Water Right".

29 19. Although all quantities of water hereinafter allotted to
30 the several claimants for direct application to beneficial use are several-
31 ly expressed in terms of continuous flow, nevertheless, nothing herein

1 contained shall be construed as limiting or restricting the rights of any
2 such claimants to rotate in the use of water, or the right of any such
3 claimant to divert for limited periods of time convenient irrigation heads
4 and thus apply water to his lands at a greater rate than indicated by the
5 quantity of continuous flow so allotted; provided, that such practice of
6 rotation or use of irrigation heads shall not result in the use by any such
7 claimant of a total quantity of water during any thirty-day period in ex-
8 cess of the equivalent of such claimant's continuous flow allowance for
9 thirty days, except as hereinafter otherwise expressly provided in paragraph
10 30; and provided further, that such practice of rotation or such use of
11 irrigation heads shall not impair or infringe the rights of any other
12 claimant.

13 20. Nothing herein contained shall, or shall be construed to,
14 prevent any of the claimants herein, who jointly use a ditch where there
15 is a continuous flow allotment to said ditch, from employing by agreement
16 of such joint users of said ditch a system of rotation in use as among
17 themselves; or prevent any claimant herein who has allotments to two or
18 more ditches, from using all or any portion of the aggregate of such
19 allotments through each or any of said ditches on all or any portion of
20 his lands; provided the total quantity of water diverted by said claimant
21 at any time shall not exceed said aggregate of such allotments; and pro-
22 vided further, such practice of rotation or such use of combined allot-
23 ments shall not impair or infringe the rights of any other claimant.

24 21. The term "directly apply to beneficial use" means the
25 direct conveyance and application of water diverted to beneficial use
26 without intermediate storage, except such regulatory storage as may be
27 practiced for the purpose of equalizing the flow of water diverted for a
28 convenient irrigation head.

29 22. The term "natural flow" means such flow as will naturally
30 occur at any given point in a stream from the runoff of the watershed
31 which it drains, from springs which naturally contribute to the stream,

1 from seepage, and from waste and return flow from dams, conduits and
2 irrigated lands, as distinguished from released stored water, and from
3 foreign water directly conveyed to the stream from another watershed.

4 23. Nothing herein contained shall, or shall be construed to,
5 allocate to any claimant a right to divert from the stream system, at any
6 time, a quantity of water in excess of the amount reasonably necessary for,
7 and actually applied to, reasonable beneficial use under and by reasonable
8 methods of diversion and use by said claimant.

9 24. The "Division of Water Resources Map", hereinafter referred
10 to as D.W.R. Map, is the map prepared by the Department from its surveys
11 made in 1944, which map is entitled "Shackleford Creek Stream System
12 Showing Diversions and Irrigated Lands, Siskiyou County, California", is
13 dated 1944, and is on file in this proceeding.

14

15

DEFINITION OF WATER RIGHTS

16 25. The rights in and to the waters, and in and to the use
17 thereof, from said stream system are divided into four groups designated
18 as Upper Shackleford Creek Group, Lower Shackleford Creek Group, Upper
19 Mill Creek Group, and Lower Mill Creek Group, and one incomplete right
20 of Jesse Arnold Cason and Roy J. Helm. All rights in each of the groups
21 are independent of all rights in the remaining three groups, and are
22 superior in priority and in right to the incomplete right.

23 26. The various claimants in the proceeding are entitled to
24 use of the waters of said stream system upon the places of use hereinafter
25 described under their respective names in Schedule 1, and are entitled to
26 divert said waters at the respective points of diversion from said stream
27 system as hereinafter named, numbered and described in Schedule 2. The
28 respective points of measurement of the quantities of water hereinafter
29 allotted to the several claimants are at or near said respective points
30 of diversion from said stream system.

31 27. The various claimants in the proceeding are entitled to

1 "interrelated", "winter class", and "surplus class" water rights and one
2 incomplete right. All allocations of "interrelated" water rights in each
3 of said groups in said stream system, as hereinbefore designated in
4 paragraph 25, occur in various priority classes and are hereinafter set
5 forth in Schedules 3, 4, 5 and 6; each of the Upper Shackelford Creek,
6 Lower Shackelford Creek and Upper Mill Creek groups, contains rights in
7 "winter class" as hereinafter set forth in paragraphs 31, 35 and 38, which
8 rights are independent of all "interrelated" rights in the group in which
9 said "winter class" rights occur. The Upper Shackelford Creek Group
10 contains one right in "surplus class" as hereinafter set forth in paragraph
11 32, in addition to the water right allocations set forth in said Schedule
12 3 and paragraph 31, which right is subject and inferior to all other rights
13 in said Upper Shackelford Creek Group. The incomplete right is herein-
14 after set forth in paragraph 41, and is subject and inferior to all other
15 rights in the stream system.

16 28. The allotments set forth in various priority classes in
17 Schedules 3, 4, 5, and 6 shall be for use during the seasons hereinafter
18 stated in paragraphs 30, 34, 37 and 40 and the allotments to all other
19 rights shall be for use during the seasons hereinafter stated in the
20 various paragraphs defining said rights.

21

22 Definition of Water Rights in Upper Shackelford Creek Group

23 29. The Upper Shackelford Creek Group, as hereinbefore designated
24 in paragraph 25, comprises all rights in and to the waters, and in and to
25 the use thereof in Shackelford Creek above the junction of Shackelford
26 Creek and Mill Creek except the incomplete right hereinafter set forth in
27 paragraph 41. Said group contains "interrelated" rights in seven priority
28 classes, as set forth in Schedule 3 hereof and hereinafter defined in
29 paragraph 30; "winter class" rights in two priority classes, as herein-
30 after set forth and defined in paragraph 31; and one right in "surplus
31 class", as hereinafter set forth and defined in paragraph 32.

1 30. The various claimants enumerated in Schedule 3 hereof are
2 entitled to "interrelated" rights in priority class "1st", priority class
3 "2nd", priority class "3rd", priority class "4th", priority class "5th",
4 priority class "6th", and priority class "7th" in and to the use of the
5 natural flow of Shackleford Creek, during the season from April 1 to
6 October 31, both dates inclusive, of each year, for domestic, stockwatering
7 and irrigation purposes upon their respective lands as shown on said D.W.R.
8 Map and as described under their respective names in Schedule 1 hereof, in
9 accordance with the acreages to be supplied, priorities and quantities of
10 water allotted, and through the diversions numbered as set forth in said
11 Schedule 3. Said rights in priority class "1st" are equal in priority and
12 correlative in right, but are superior in priority and in right to all other
13 rights in said Schedule 3, and to said right hereinafter defined in "surplus
14 class", and at all times when the available water supply is inadequate to
15 supply all of said rights in priority class "1st", then during the con-
16 tinuance of such shortage, the owners of such rights shall prorate the
17 available water supply in accordance with their respective allotments in
18 said priority class "1st" as set forth in said Schedule 3. Said right in
19 priority class "2nd" is subject and inferior to said rights in priority
20 class "1st", but is superior in priority and in right to all other rights
21 in said Schedule 3, and to said right hereinafter defined in "surplus class".
22 Said right in priority class "3rd" is subject and inferior to said rights
23 in priority classes "1st" and "2nd", but is superior in priority and in
24 right to all other rights in said Schedule 3, and to said right hereinafter
25 defined in "surplus class". Said rights in priority class "4th" are equal
26 in priority and correlative in right, are subject and inferior to said
27 rights in priority classes "1st" to "3rd", inclusive, but are superior
28 in priority and in right to all other rights in said Schedule 3, and to
29 said right hereinafter defined in "surplus class", and at all times when
30 the available water supply is inadequate to supply all of said rights in
31 priority class "4th", then during the continuance of such shortage, the

1 owners of such rights shall prorate the available water supply, if any,
2 in excess of the quantity required to supply all prior rights, in accord-
3 ance with their respective allotments in said priority class "4th" as
4 set forth in said Schedule 3. Said right in priority class "5th" is
5 subject and inferior to said rights in priority classes "1st" to "4th",
6 inclusive, but is superior in priority and in right to all other rights in
7 said Schedule 3, and to said right hereinafter defined in "surplus class".
8 Said right in priority class "6th" is subject and inferior to said rights
9 in priority classes "1st" to "5th", inclusive, but is superior in priority
10 and in right to all other rights in said Schedule 3, and to said right
11 hereinafter defined in "surplus class". Said rights in priority class
12 "7th" are equal in priority and correlative in right, are subject and
13 inferior to said rights in priority classes "1st" to "6th", inclusive, but
14 are superior in priority and in right to said right hereinafter defined in
15 "surplus class", and at all times when the available water supply is
16 inadequate to supply all of said rights in priority class "7th", then during
17 the continuance of such shortage, the owners of such rights shall prorate
18 the available water supply, if any, in excess of the quantity required to
19 supply said prior rights, in accordance with their respective allotments
20 in said priority class "7th" as set forth in said Schedule 3, provided,
21 however, that whenever the flow available for diversion from Shackelford
22 Creek under the rights set forth in said Schedule 3 is in excess of 28.93
23 cubic feet per second, water may be diverted from such excess flow under
24 right in said priority class "6th" and all rights in said priority class
25 "7th" at three times the average rate of diversion respectively set forth
26 therefor in said Schedule 3.

27 31. The various claimants hereinafter enumerated in this
28 paragraph are entitled to "winter class" rights in priority class "1st"
29 and priority class "2nd" in and to the use of the natural flow of
30 Shackelford Creek, during the season from November 1 of each year to and
31 including March 31 of the succeeding year, for domestic and stock-watering

1 purposes upon their respective lands as shown on said D.W.R. Map and as
 2 described under their respective names in Schedule 1 hereof, in accordance
 3 with the quantities of water and priorities allotted and through the
 4 diversions numbered as set forth opposite their respective names, to wit:

5

6	Name of Claimant	Diversion No. as per D.W.R. Map	Allotment in Cubic Feet Per Second	Priority Class

12	Cecil Graham and	4	2.00	2nd
13	Camille Zwanziger			
14			_____	
15				
16		Total	4.03	
17				

18 Said rights in priority class "1st" are equal in priority and correlative
 19 in right, but are superior in priority and in right to said rights in
 20 priority class "2nd", and to said right hereinafter defined in "surplus
 21 class", and at all times when the available water supply is inadequate
 22 to supply all of said rights in priority class "1st", then during the
 23 continuance of such shortage, the owners of such rights shall prorate the
 24 available water supply in accordance with their respective allotments in
 25 said priority class "1st" as set forth in this paragraph. Said rights
 26 in priority class "2nd" are equal in priority and correlative in right,
 27 are subject and inferior to said rights in priority class "1st", but are
 28 superior in priority and in right to said right hereinafter defined in
 29 "surplus class", and at all times when the available water supply is
 30 inadequate to supply all of said rights in priority class "2nd", then
 31 during the continuance of such shortage, the owners of such rights shall

1 prorate the available water supply, if any, in excess of the quantity
2 required to supply said prior rights, in accordance with their respective
3 allotments in said priority class "2nd" as set forth in this paragraph.

4 32. Subject to all rights hereinbefore defined,

5 CECIL GRAHAM AND CAMILLE ZWANZIGER, collectively, are entitled
6 as a right in "surplus class" to impound the waters of the South Fork of
7 Shackleford Creek in Cliff Lake and Campbell Lake at points designated
8 on said D.W.R. Map as Diversions 1 and 2, respectively, and described in
9 Schedule 2 hereof, as follows:

10 150 acre-feet per annum in Cliff Lake, and

11 350 acre-feet per annum in Campbell Lake,

12 or as much thereof as they thereafter apply to beneficial use for stock-
13 watering purposes and for the irrigation of 310.4 acres of their lands
14 as hereinafter described under their names in Schedule 1 hereof. Said
15 quantities of water shall be collected in said lakes during the period
16 from November 1 of each year to and including June 30 of the succeeding
17 year, and thereafter withdrawn from storage during the period from April
18 1 to October 31, both dates inclusive, of each year, re-diverted from
19 Shackleford Creek through the Shackleford Ditch at a point designated on
20 said D.W.R. Map as Diversion 4 and described in Schedule 2 hereof, and
21 applied to beneficial use for the aforesaid purposes.

22

23 Definition of Water Rights in Lower Shackleford Creek Group

24 33. The Lower Shackleford Creek Group, as hereinbefore designated
25 in paragraph 25, comprises all rights in and to the waters, and in and to
26 the use thereof in Shackleford Creek below the junction of Shackleford and
27 Mill Creeks. Said group contains "interrelated" rights in seven priority
28 classes, as set forth in Schedule 4 hereof and hereinafter defined in
29 paragraph 34; and "winter class" rights equal in priority and correlative
30 in right, as hereinafter set forth and defined in paragraph 35.

31

1 34. The various claimants enumerated in Schedule 4 hereof are
2 entitled to "interrelated" rights in priority class "1st", priority class
3 "2nd", priority class "3rd", priority class "4th", priority class "5th",
4 priority class "6th" and priority class "7th" in and to the use of the
5 natural flow of Shackelford Creek, during the season from April 1 to
6 October 31, both dates inclusive, of each year, for domestic, stock-water-
7 ing and irrigation purposes upon their respective lands as shown on said
8 D.W.R. Map and as described under their respective names in Schedule 1
9 hereof, in accordance with the acreages to be supplied, priorities and
10 quantities of water allotted, and through the diversions numbered as set
11 forth in said Schedule 4. Said rights in priority class "1st" are equal
12 in priority and correlative in right, but are superior in priority and
13 in right to all other rights in said Schedule 4, and at all times when
14 the available water supply is inadequate to supply all of said rights in
15 priority class "1st", then during the continuance of such shortage, the
16 owners of such rights shall prorate the available water supply in accord-
17 ance with their respective allotments in said priority class "1st" as set
18 forth in said Schedule 4. Said rights in priority class "2nd" are equal in
19 priority and correlative in right, are subject and inferior to said rights
20 in priority class "1st", but are superior in priority and in right to all
21 other rights in said Schedule 4, and at all times when the available
22 water supply is inadequate to supply all of said rights in priority class
23 "2nd", then during the continuance of such shortage, the owners of such
24 rights shall prorate the available water supply, if any, in excess of the
25 quantity required to supply all prior rights, in accordance with their
26 respective allotments in said priority class "2nd" as set forth in said
27 Schedule 4. Said rights in priority class "3rd" are equal in priority
28 and correlative in right, are subject and inferior to said rights in
29 priority classes "1st" and "2nd", but are superior in priority and in
30 right to all other rights in said Schedule 4, and at all times when the
31 available water supply is inadequate to supply all of said rights in

1 priority class "3rd", then during the continuance of such shortage, the
2 owners of such rights shall prorate the available water supply, if any,
3 in excess of the quantity required to supply all prior rights, in
4 accordance with the respective allotments in said priority class "3rd"
5 as set forth in said Schedule 4. Said right in priority class "4th" is
6 subject and inferior to said rights in priority classes "1st" to "3rd",
7 inclusive, but is superior in priority and in right to all other rights
8 in said Schedule 4. Said rights in priority class "5th" are equal in
9 priority and correlative in right, are subject and inferior to said
10 rights in priority classes "1st" to "4th", inclusive, but are superior in
11 priority and in right to all other rights in said Schedule 4, and at all
12 times when the available water supply is inadequate to supply all of said
13 rights in priority class "5th", then during the continuance of such
14 shortage, the owners of such rights shall prorate the available water
15 supply, if any, in excess of the quantity required to supply all prior
16 rights, in accordance with their respective allotments in said priority
17 class "5th" as set forth in said Schedule 4. Said rights in priority
18 class "6th" are equal in priority and correlative in right, are subject
19 and inferior to said rights in priority classes "1st" to "5th", inclusive,
20 but are superior in priority and in right to all other rights in said
21 Schedule 4, and at all times when the available water supply is inadequate
22 to supply all of said rights in priority class "6th", then during the
23 continuance of such shortage, the owners of such rights shall prorate
24 the available water supply, if any, in excess of the quantity required
25 to supply all prior rights, in accordance with their respective allot-
26 ments in said priority class "6th" as set forth in said Schedule 4. Said
27 rights in priority class "7th" are equal in priority and correlative in
28 right, are subject and inferior to said rights in priority classes
29 "1st" to "6th", inclusive, and at all times when the available water
30 supply is inadequate to supply all of said rights in priority class
31 "7th", then during the continuance of such shortage, the owners of such

1 rights shall prorate the available water supply, if any, in excess of
 2 the quantity required to supply all prior rights, in accordance with
 3 their respective allotments in said priority class "7th" as set forth in
 4 said Schedule 4.

5 35. The various claimants hereinafter enumerated in this
 6 paragraph are entitled to "winter class" rights in and to the use of the
 7 natural flow of Shackelford Creek, during the season from November 1 of
 8 each year to and including March 31 of the succeeding year, for domestic
 9 and stock-watering purposes upon their respective lands as shown on said
 10 D.W.R. Map and as described under their respective names in Schedule 1
 11 hereof, in accordance with the quantities of water allotted and through
 12 the diversions numbered as set forth opposite their respective names, to wit:

 26 Said rights are equal in priority and correlative in right, and at all
 27 times when the available water supply is inadequate to supply all of said
 28 rights set forth in this paragraph, then during the continuance of such
 29 shortage, the owners of such rights shall prorate the available water
 30 supply in accordance with their respective allotments as set forth in this
 31 paragraph.

1 Definition of Water Rights in Upper Mill Creek Group

2 36. The Upper Mill Creek Group, as hereinbefore designated in
3 paragraph 25, comprises all rights in and to the waters, and in and to
4 the use thereof in Mill Creek above the point where the Shackelford Ditch
5 crosses said Mill Creek. Said group contains "interrelated" rights in
6 three priority classes, as set forth in Schedule 5 hereof and hereinafter
7 defined in paragraph 37; and "winter class" rights equal in priority and
8 correlative in right, as hereinafter set forth and defined in paragraph 38.

9 37. The various claimants enumerated in Schedule 5 hereof are
10 entitled to "interrelated" rights in priority class "1st", priority class
11 "2nd", and priority class "3rd" in and to the use of the natural flow of
12 Mill Creek, during the season from April 1 to October 31, both dates
13 inclusive, of each year, for domestic, stock-watering and irrigation
14 purposes upon their respective lands as shown on said D.W.R. Map and as
15 described under their respective names in Schedule 1 hereof, in accord-
16 ance with the acreages to be supplied, priorities and quantities of water
17 allotted, and through the diversions numbered as set forth in said
18 Schedule 5. Said right in priority class "1st" is superior in priority
19 and in right to said rights in priority classes "2nd" and "3rd". Said
20 rights in priority class "2nd" are equal in priority and correlative in
21 right, are subject and inferior to said right in priority class "1st",
22 but are superior in priority and in right to said right in priority class
23 "3rd", and at all times when the available water supply is inadequate to
24 supply all of said rights in priority class "2nd", then during the
25 continuance of such shortage, the owners of such rights shall prorate
26 the available water supply, if any, in excess of the quantity required
27 to supply all prior rights, in accordance with their respective allotments
28 in said priority class "2nd" as set forth in said Schedule 5; provided
29 however, at all times when the flow available for said rights in priority
30 class "2nd" is equal to or less than 0.50 cubic foot per second, then
31 during such times the available flow shall be divided equally among the

1 three owners of said rights in priority class "2nd" in accordance with
 2 the provisions of that certain agreement dated July 31, 1943, recorded
 3 on June 14, 1945, in Book 171, Official Records, Siskiyou County,
 4 California, a copy of which said agreement is on file in this proceeding.
 5 Said right in priority class "3rd" is subject and inferior to said rights
 6 in priority classes "1st" and "2nd".

7 38. The various claimants hereinafter enumerated in this
 8 paragraph are entitled to "winter class" rights in and to the use of the
 9 natural flow of Mill Creek, during the season from November 1 of each
 10 year to and including March 31 of the succeeding year, for domestic and
 11 stock-watering purposes upon their respective lands as shown on said
 12 D.W.R. Map and as described under their respective names in Schedule 1
 13 hereof, in accordance with the quantities of water allotted and through
 14 the diversions numbered as set forth opposite their respective names,
 15 to wit:

16	Name of Claimant	Diversion	Allotment

29 Said rights are equal in priority and correlative in right, and at all
 30 times when the available water supply is inadequate to supply all of said
 31 rights set forth in this paragraph, then during the continuance of such

1 shortage, the owners of such rights shall prorate the available water
2 supply in accordance with their respective allotments as set forth in
3 this paragraph.

4

5 Definition of Water Rights in Lower Mill Creek Group

6 39. The Lower Mill Creek Group, as hereinbefore designated in
7 paragraph 25, comprises all rights in and to the waters, and in and to the
8 use thereof in Mill Creek between the point where the Shackelford Ditch
9 crosses said Mill Creek and the point where said Mill Creek joins
10 Shackelford Creek. Said group contains "interrelated" rights in two pri-
11 ority classes, as set forth in Schedule 6 hereof and hereinafter defined
12 in paragraph 40.

13 40. The various claimants enumerated in Schedule 6 hereof are
14 entitled to "interrelated" rights in priority class "1st" and priority
15 class "2nd" in and to the use of the natural flow of Mill Creek for
16 domestic, stock-watering and irrigation purposes upon their respective
17 lands as shown on said D.W.R. Map and as described under their respective
18 names in Schedule 1 hereof, in accordance with the acreages to be supplied,
19 priorities and quantities of water allotted, and through the diversions
20 numbered as set forth in said Schedule 6. Said rights in priority class
21 "1st" are for continuous usage without regard to season, are equal in
22 priority and correlative in right, but are superior in priority and in
23 right to said rights in priority class "2nd", and at all times when the
24 available water supply is inadequate to supply all of said rights in
25 priority class "1st", then during the continuance of such shortage, the
26 owners of such rights shall prorate the available water supply in accord-
27 ance with their respective allotments as set forth in said Schedule 6.
28 Said rights in priority class "2nd" are for continuous usage during the
29 season from April 1 to October 31, both dates inclusive, of each year, are
30 equal in priority and correlative in right, but are subject and inferior
31 to said rights in priority class "1st", and at all times when the available

1 water supply is inadequate to supply all of said rights in priority class
2 "2nd", then during the continuance of such shortage, the owners of such
3 rights shall prorate the available water supply, if any, in excess of the
4 quantity required to supply all prior rights, in accordance with their
5 respective allotments as set forth in said Schedule 6.

6

7 Definition of Incomplete Right of Jesse Arnold Cason and Roy J. Helm

8 41. Subject to all rights hereinbefore defined,
9 JESSE ARNOLD CASON AND ROY J. HELM, collectively, are entitled
10 to divert from the natural flow of Shackelford Creek at a point within
11 the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 9, T. 43 N., R. 10 W., M.D.B.&M.

12 1.00 cubic foot per second,
13 from about March 15 to July 1 of each season for domestic and irrigation
14 purposes and such amount of water as is required from about October 1 of
15 each year to about March 15 of the succeeding year for domestic purposes
16 only; said water to be used for the aforesaid purposes upon the following
17 described lands all in accordance with Application 10350 filed December
18 31, 1941, with the Department:

19

20 5.0 acres in NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 10, T. 43 N., R. 10 W., M.D.B.&M.

1 IT IS FURTHER ORDERED, ADJUDGED AND DECREED as follows:

2 42. That the court retains continuing jurisdiction of the parties
3 to this proceeding, and of the subject matter thereof, and upon application
4 of any party hereto, or successor in interest thereof, or upon its own
5 motion, to review this decree and to change and modify the same as the inter-
6 ests of justice may require.

7 43. That each and every party to this action, his or her
8 agents, successors, grantees and assigns, be and hereby are estopped to
9 object to or interfere with the respective rights of others which are de-
10 creed herein.

11 44. That each and every party to this action, his or her agents,
12 successors, grantees and assigns, be and are hereby perpetually enjoined and
13 restrained from doing anything in violation of the terms or provisions of
14 this judgment and decree, and from diverting any water from said Shackelford
15 Creek and its tributaries at any time in excess of a quantity reasonably
16 necessary for, and actually applied to, reasonable beneficial use, under
17 and by reasonable methods of diversion and use, and from doing anything,
18 directly or indirectly, that will obstruct or interfere with any right of
19 another adjudged and decreed herein.

20 45. The Department having computed the entire expense incurred
21 in performing the duties prescribed, in this proceeding, and having
22 equitably apportioned against the parties to this proceeding the amount by
23 which said entire expense exceeded the total amount received from claimants
24 on account of fees paid at the time of submission of proofs of claim, and
25 having given notice thereof to the parties to this proceeding; no objection
26 having been made to said expense or apportionment thereof; said appoint-
27 ments having become due and payable to said Department by the respective
28 parties; and all parties having heretofore paid their respective apporportion-
29 ments excepting those parties against whom decree in favor of said
30 Department is rendered as follows:

1 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that the Department
 2 of Public Works, Division of Water Resources, acting through the State
 3 Engineer, do have and recover of and from the respective parties to this
 4 proceeding the amounts of money as respectively hereinafter set forth
